OUR PROJECTS

*Creating opportunities for the future –
Education, healthcare and inclusion*

Hochrhein-Baobab-Tanzania e. V. is committed to improving the life chances and educational opportunities of children and young people in Tanzania. A particular focus is on children and young people with disabilities.

Together with our long-standing local partners, we provide access to medical care, therapy and assistive devices, as well as opportunities for education, university studies and vocational training. Our projects are planned together and implemented directly on the ground – according to local needs, with a focus on sustainability and with close personal involvement.

Our partners are **Hale Parish**, the **NGO NAFGEM in Moshi**, and the **Evangelical Lutheran Church of Tanzania (ELCT) in Msitu wa Tembo**.

NAISHYE

Naishye lost her sight as a **young child** as a result of eye cancer. Together with NAFGEM, we were able to find a place for her at a school with a boarding facility. There, she receives appropriate education and has the opportunity to build a more independent future.

EDUCATION

Education opens doors

Many children with disabilities do not have the opportunity to attend school. Together with our partners, we create opportunities for appropriate educational support. Depending on their individual needs, children attend either an inclusive or a special school. For these children, education means more than learning. It also means social inclusion and new opportunities for the future.

UNIVERSITY EDUCATION

Supporting young people on their educational journey

We support talented young adults on their way to university or vocational training. We cover tuition fees and also help with the cost of learning materials, accommodation and meals. This gives young people the opportunity to develop their abilities and build an independent future.

HEALTHCARE

Medical support that makes a difference

We fund necessary medical consultations, surgeries, medication and assistive devices. These include wheelchairs, beds, therapy equipment and hygiene supplies. If families cannot afford health insurance, we help cover the costs. We also support home adaptations to improve safety and accessibility in everyday life.

OUR PARTNERS

Together, we can achieve more

Our projects are built on trust and long-standing partnerships. Together with our partner organisations, we develop solutions that respond to the needs of people in their local communities.

Hale Parish – Community Oriented Rehabilitation Program (COR)

Together with Hale Parish, we support the Community Oriented Rehabilitation (COR) Program. Children with disabilities and their families receive medical advice, therapeutic support and assistance with their education.

A Day Care Centre for children and young people with disabilities is being developed. It will provide basic care, support greater social inclusion and help ease the burden on families.

NGO NAFGEM – Supporting families

Together with **NAFGEM**, we have established a counselling and support centre for families with children with disabilities at the NAFGEM Safe House in Engassumet. During therapy weeks and home visits, families receive therapeutic support and individual counselling. This brings together medical care, therapy and support for parents. Educational opportunities, especially for children and young people with complex disabilities, are another important focus of our work. An inclusive education centre with a boarding facility in Engassumet is currently in the planning stage. It will provide children with and without disabilities with access to education in an inclusive environment.

Evangelical Lutheran Church of Tanzania (ELCT) in Msitu wa Tembo with the Umoja Center

In **Msitu wa Tembo**, we support the Umoja Center, an existing school for children with disabilities, by providing therapy materials, medication and assistive devices. The development of additional facilities and more comprehensive physiotherapy services on site is underway. These improvements will help strengthen the quality of care and support.

A chicken-raising project also provides the school with its own source of income and contributes to its long-term financial independence.

TRAINING AND PROFESSIONAL DEVELOPMENT

Well-trained professionals are essential for providing sustainable support. That is why we support further training and professional development for staff members of our partner organisations. In this way, we help strengthen the quality of care and support provided to children and families.
